

Help Compech Dev
Get his Money Back

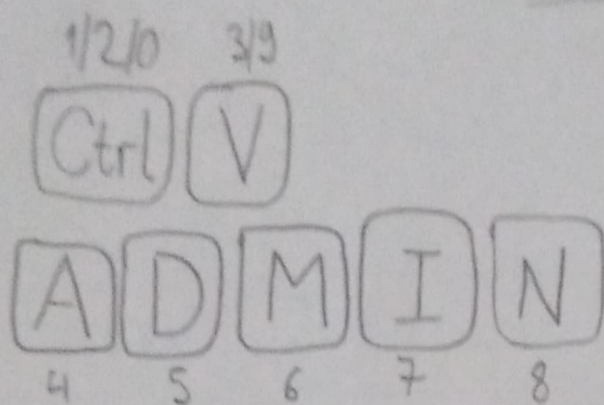

CSAABEG #1

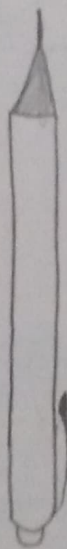

One very boring day, CompechDev decided to go to the PCG Discord. He noticed he had been passed. So he gambled all his money and became broke. What an idiot.

CompechDev

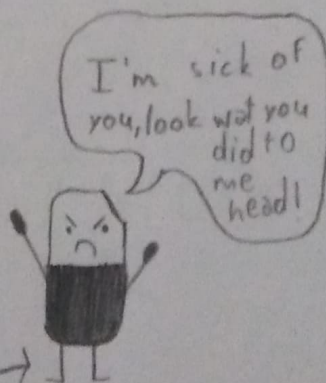

Key Select

JOURNAL

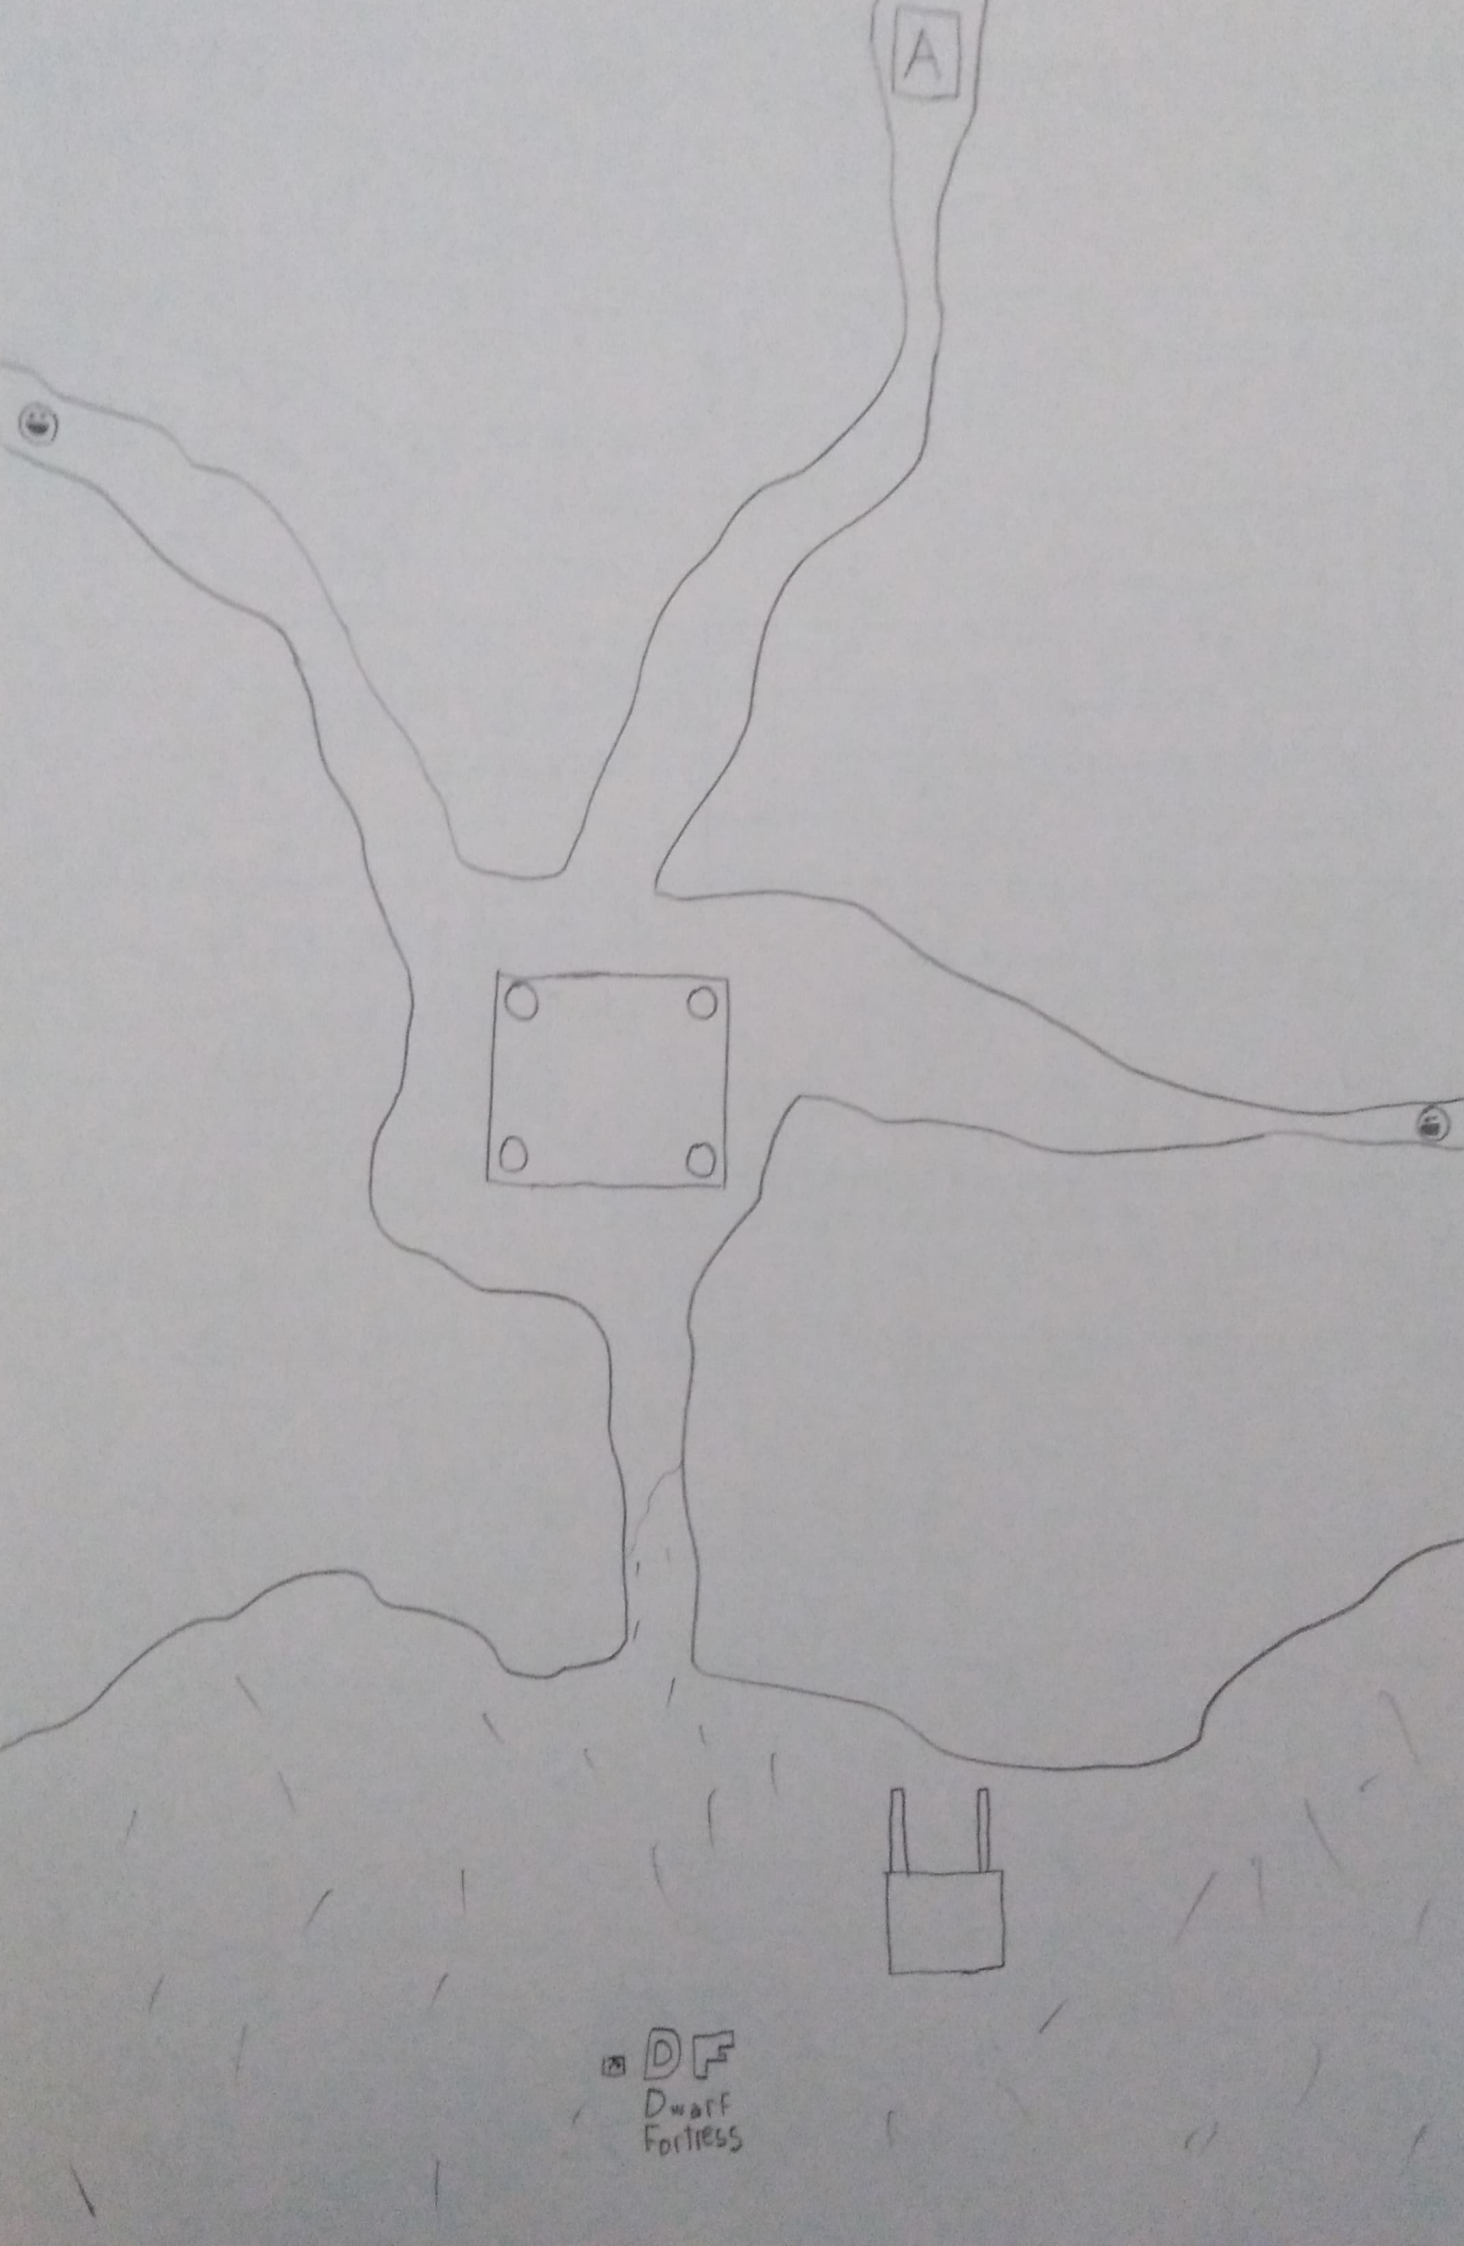

This is Typeguy. Take a look at your clock (A digital clock would be the best). The last digit of the minute is the key this guy's pressing, and that's the key you can't get until he stops pressing it. Your only option is to wait until he starts pressing some other key.

This is the eraser-jerk. He erases things from the player's journal randomly each minute.

This acts as an inventory
