Unknown Space Station

SCRIPT
2023 Paper Computer Game
By: Epic Worlds PCG

Credits: Credits to Xaq for the characters, and being super awesome!

Introduction: Bob has left behind the Balzak crew after serving them for many years he was tired of being ordered around, and he felt like he had not unlocked his full potential, so he created his own ship THe Bobvarse 6. (Sorry for the super basic script, but it should do the job, feel free to make up anything else that was not clarified.) (Sequels coming soon!)

Pg#1: Bob is on his ship, and sees a strange energy source on his sensors, so he goes to investigate. He also has his companion Kill Bot who he can activate by pressing the KILL BOT ACTIVATE button.

Pg#2: Bob sees a strange space station in the distance that feels nostalgic and welcoming.

Pg#3: Bob lands on the space station and walks out onto the docking port. He looks up to see a row of first generation tabernacles that he remembers working on when he was younger. His people were very skilled in building, and made many ships for the wars. If you look around all you see is ships, gron oil, and tools. You can go through the doors to Pg#4.

Pg#4: On this page Bob is amazed to see his long lost species called Bobons!! He is reunited with them and can communicate with them learning about how they have been in the hiding and working with organizaitons secretly across the galaxy selling ships, parts, and other items. He also learns that The Company has made quite a large order!! Bob sees that they are working on a massive ship called the Tasercron 5,000. As you look further into the hanger you see something bigger....something massive!! To be continued...
