2022 Paper Computer Game

Introduction: this game takes place 112 years after the first clouded hopes game by Xaq. You play as Jenroe, and you live on the planet saturn. You are a Cloudian, and you have always been yearning to go on an adventure, first you need a ship and crew.

Pg#1:You are in the middle of the screen, and to your left are two ring cloudians who you can talk to.

- If you talk to them then at first they will be kinda grumpy, because the surface cloudians such as yourself and the ring cloudians have never really gotten along, because they are two different species of cloudians.
- You can recruit them as your crew for the ship.
- The ship is fairly easy to control, so you set off into space not quite knowing where you are going and then you come across....(go to page #2)

Pg#2: This is kinda just a sinematic screen, so your player can't really do anything besides land the ship.\

- The planet's name is PSO 319.5-22.
- This is the exact same planet from clouded hopes 1, but 112 years later.
- You get ready to land
- The characters do not know what happened in clouded hopes 1 other than some cloudians disappeared here 112 years ago.

Pg#3: You land on the cold zone, which is basically a part of the planet that is less condensed and cold. This planet is made of gas, so you can survive on this planet fine, but the deeper you get, the harder

it is to survive, so you must go down to that hot zone where there is an old ship.

- In the old balloon ship you find 3 pressure suits, so you and the other cloudians can head deeper down into the planet.
- Scattered around what used to be a building are dead alien bodies. You can not enter the building, because its doors have been crushed and no longer usable.

Pg#4: you see another dead alien who is holding a blaster which you can use later. Below the building is a giant closed eye.

- If you poke it then go to pg#5, and if you leave it alone, it will still hear you, so you must go to pg#5.

Pg#5: The giant eye opens, and a huge creature the size of half the planet awakens, and you are in the middle of the screen looking at it. Before you can do anything it launches out of the planet's atmosphere and is gone. You can go back to your ship and follow it to Pg#6.

Pg#6: Your ship has to go to hyperdrive to catch up, you can try shooting at the beast to kill it, but you must shoot its eye, so you must sweep your ship around to the front of it to kill it. Once you kill the beast, it just floats in the middle of space.

- You and the rest of the cloudians now return to Saturn, because you have had enough adventure for a lifetime.

Pg#7: hundreds of years go by, and the beast slowly starts to deteriorate from space bugs decomposing it, and soon all that is left is a giant skull, and that is how the planet Mortalis was formed.
