Most Successful Test Subjects

	27	Subject displayed increased telepathic ability when exposed to test substance; was able to control small creatures even on light amounts of substance. Testing will continue.
Rock Gey	152	Greatly increased physical prowess when exposed to test substance; skin hardened.
Rock Girl	339	Gained affinity for ancient Zor'l'Ti technology when exposed to test substance.
Fig	406	Subject experiences an alternate personality, one which is distinctly less vermin-like. Subject gained powerful space-time manipulation capabilities.
Cosie	524	Subject displays ability to use bodily remains to heal injuries in others; subject's memories have been successfully erased.
Art	659	Subject's violent urges have been greatly increased. Subject had to resist urges to murder Subject 524, his friend.
Rom Girl	706	Subject's natural telepathic ability to project mental illusions increased tenfold.
	809	Subject shrank in size, finding himself about double the size of the Miniature People. Subject has escaped, and is living with a group of the same.
Pierre	854	Subject grew greatly in size and physical prowess; gained ability to discharge energy from hands, but suffered increased mental instability.
Boh'zak	900	Subject was converted into a creature made entirely out of energy; maintained all observable brain functions.

It is imperative that 659 does not encounter any of the other subjects; if he does, he may grow more difficult to control.

All subjects, with the exception of 900, are identifiable by the transmitter which has been placed in the back of the neck.
