How To Play

You use a calculator to keep track of everything. To craft a Weapon do 81×13 and you get 1053. That's how you keep track of score. To get Skill Points divide your score to your victories and whatever it equals to is the first 2 numbers. To craft an item do 81×4 and your score will be 324. You can explore the Paradox World find and craft items. Be careful with your item you have to upgrade it with Skill Points if you don't your sword or Weapon will Break.

Rules for Combat

You start with 7 hearts Upgrade it with Skill Points. Also with ATK and Def you start with $ATK=2$ $Def=9$. To find a enemy create some stats for it while playing for example $\text{A}=\frac{1}{2}$. Flip a coin to see who goes first. $D=2$ Who ever goes first they ATK What ever your's or there ATK stat is that's how much hearts you lose same with Defense. here is the order ATK

* If you die you can save ATK Game and it will take you Def 3 locations back. Def.

* Be sure to upgrade your ATK and Defense to get stronger.

* All Weapons like a sword or a Bow will give you a ATK plus or Def plus. The stronger your Weapon is the less it will break.
