Game Instructions

By:Epic Worlds PCG

2022 Paper Computer Game

Credits to Sketchy Penguin for the idea

Instructions: This is basically a bunch of random screens that kinda connect to each other that you guys can use to intertwine and make your very own games out of.

- **Put the screens in any order you wish**
- **Figure out character names, and what each item is**
- **Plan a overall story to your game and each screen**
- **Then just improvise the rest when playing**

This is only part 1 of a series of no-script games I plan on making. Feel free to expand on this PCG and make sequels exploring this world or other characters, and upload them to the shop for others to play.
