

Go to Page One Instructions

1. Only move to a new page when the puzzle tells you to..
 - Go to page...
 - Proceed to page...
 - Move forward...
 - (or any other clear means of advancing pages)

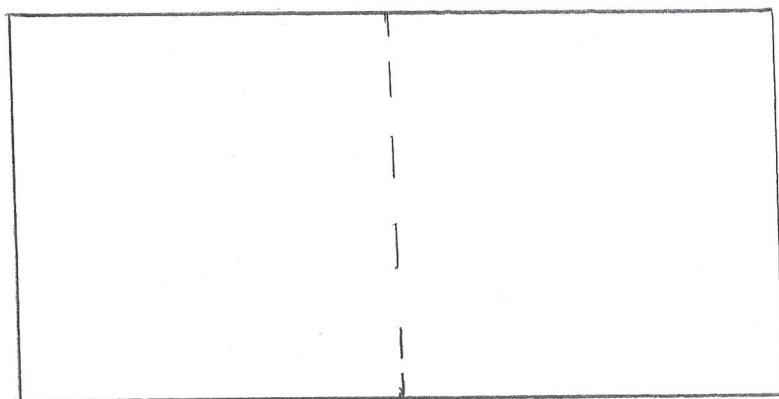

If the puzzle reveals a message that is not clear on where to go then the puzzle is not solved correctly
2. You are allowed to cut, rip, fold, or change the pages in any way.
3. If you are stuck on a puzzle, you can always return to page one. (All pages do have some means of advancing to another page)
4. Only look at the numbered pages. A page is numbered only if there is a number written at the bottom right corner of the page.
 - Some pages have a un-numbered page paired to them. After altering a number page due to clues in a puzzle, messages from the paired un-numbered page will be revealed to the player

For those whose sides are 3
Should surely go to ground
For those of sides of 4
Will never come around
But those who has all sides of 5
Their pathway shall be found

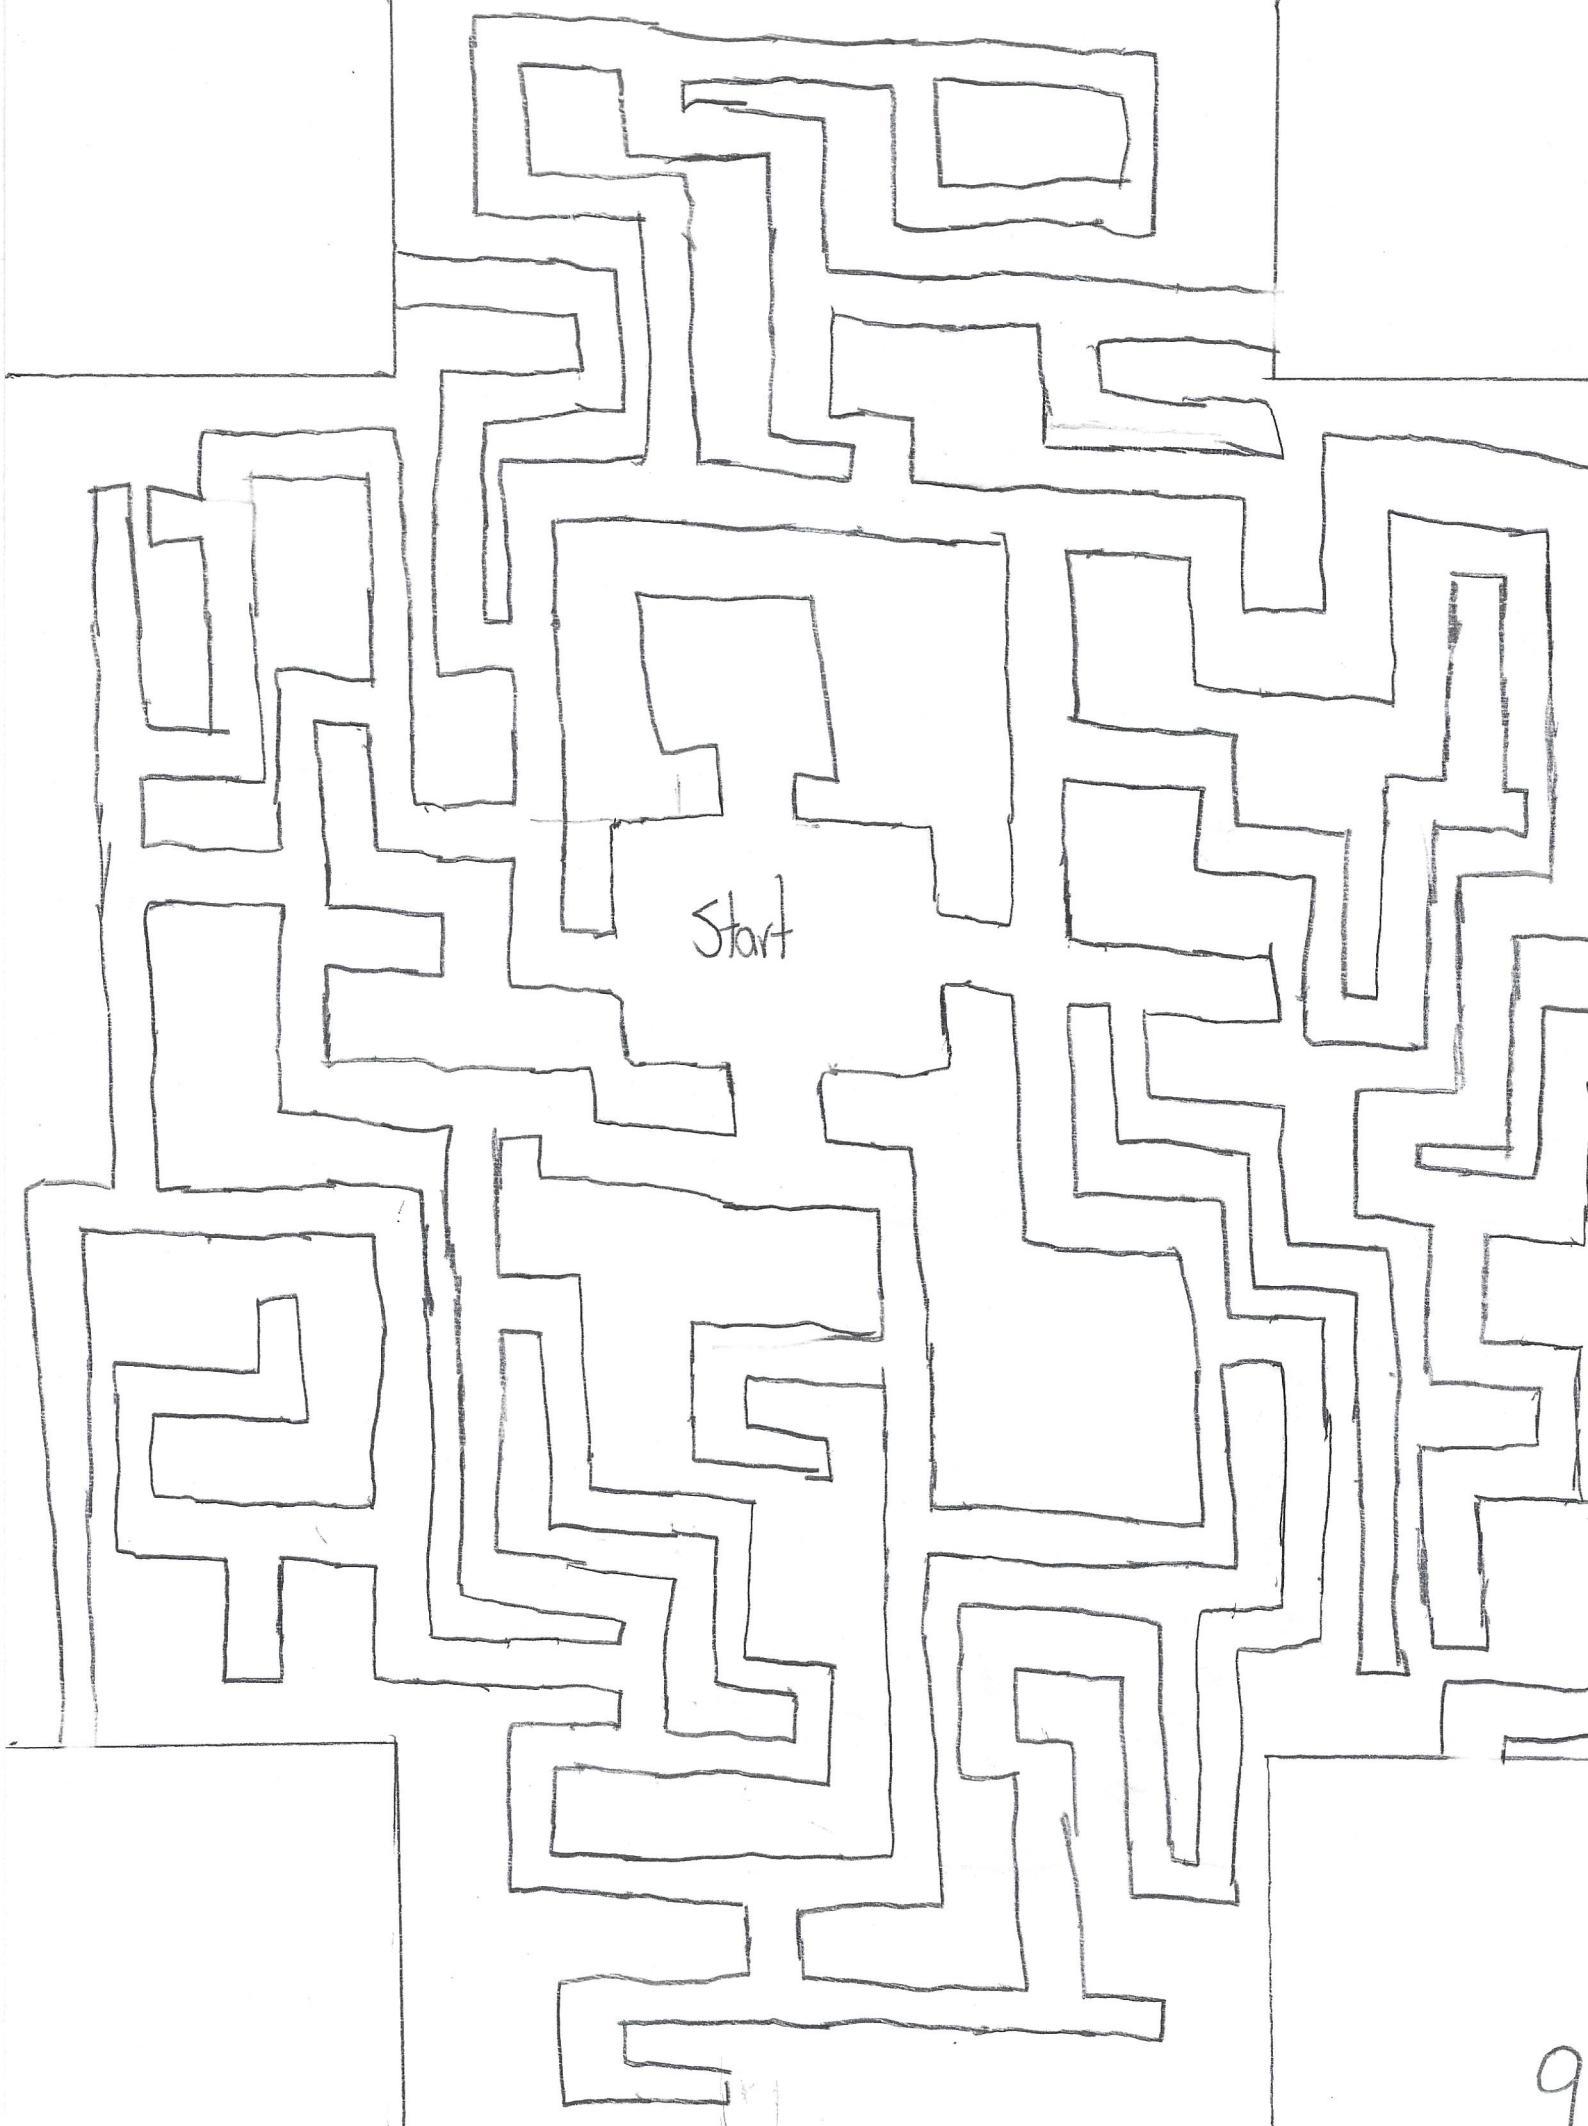

Go to page...

One is usefull the rest not so
Only one is used to let you go
